When was the last time your HVAC filters were changed?
Did you know your system works harder and uses more
energy when it's blowing through a clogged filter?

Clean faucet aerators and shower heads to remove mineral deposits. Do this with inside and outside faucets. It may also be a good time to check for leaks and the condition of your hoses under the sink and attached to your appliances.

Check your AC filter again this month. With the build-up from dust and allergens from spring and early summer, give that filter a check to ensure you are maximizing your system during the height of summer.

How’s your garbage disposal running? Clean your garbage disposal by grinding ice cubes, then flushing with hot water and baking soda. If it sounds funny when it runs or if it still smells funky, it might be time to have it inspected.
