My Haflinger's
Vital Signs

& Health
Indicators

Temperature

normal adult average at rest

99-101.5°F

call your veterinarian if temperature is more than 102°

How to take: The most accurate way to take a horse's temperature is rectally. Always secure a string to the end of the thermometer so it doesn't get lost.

Pulse

normal adult

35-40

beats per minute

(foal 70-120; yearling 45-60)

How to take: The facial artery can be found at the bottom side of the jaw where it crosses over the bone. Count the beats for 15 seconds and multiply by four to achieve beats per minute.

Respiration

normal adult at rest

8-15

breaths per minute

Respiration rate increases with hot or humid weather, exercise, fever, or pain. **Rapid breathing at rest should receive veterinary attention.**

How to take: Watch or feel horse's rib-cage/belly for one minute. Be sure to count one inhale and one exhale as one breath (not as two). Each breath is fairly slow.
